## How to draw easy cartoon girl

helle! Today I will show you how to draw a simple anime character. You only need:•1x HB pencil•1x rubber• PaperSo now you've got that, let's started! What I've done shows only one eye, you can do two. You love Ellie. You may also like to pull eyelashes and other details, go ahead! By the head, it's not too hard to do since I'm just doing a side view. It's time to put some expression on your personality, you can do whatever you want. I added a guide. Pull your hair. I appreciate it if you left comments and told me what you think, what I should draw next, and also shows me how your paintings turned out. I'm more than happy to draw more things for you, and you're more than welcome to tell me where to improve my paintings. I am open to any comments. P.S., please follow me! Do you remember the paper? Many painting programs had come to the iPad earlier, but the paper featured tightly curated controls, focusing on making the most important aspects of complete painting (and just as many automates). If you know the paper, you might understand this statement: the loop is like paper for animation. So now, you might be surprised, what's Loop? Ring is an Apple app by Universal Everything--Animation Studio you may know best for coldplay concert art and Samsung utilities. As mentioned above, this animation software is superb, deliberately limited. The loop allows you to draw only in three colors (red, black, and blue), duplicate or trace the previous frame, and import a movie as stencil if you need one. When you're done drawing your frames, hit the game for previews. And that's about it. Typing, that feature set may seem like a lot. Compared to other animation programs, it's nothing. Since all these controls exist in a permanent, fast-fire HUD, even an impartial squander of fingers like myself can create fluid animations in under a minute. (They save as small animated GIFs.) Ironically enough, though, Loop wasn't originally made for me or for you. The program was actually created at home by Universal Everything to help your high end, the CGI animator in rediscovering its roots. As the output of our studios has developed over the years, it is further separated from the humanistic analog features of the drawn line. We wanted to bring that aesthetic back into the studio, so we developed a talked-about tool to get to this. We found it a joy to use, especially the dirty flaws and the life and line-drawn hands-on animation, he says. So, we decided to publish the tool as a beta program to see what the world could do with it.Results, which you can see more than on the ring site, written and bohemian-less Disney than less polished Nickelodeon than schizophrenia. But it lies charm: while it is certainly possible to create something astonished in the ring, sooner or later, you shall save it as a small compress yes. So as a creator, everything from UI to final output is pushing you to repeat quickly and make hero mistakes. In fact, you'll discover that the only function that doesn't really work well in Loop is its cleansing tool. And the more I play with the app, the more that mistake feels deliberate. Download it here. [Hat tip: TechCrunch] drawing cartoon skateboarding may seem fairly difficult, but believe it or not, it can be done in five simple steps. Bring your skateboarder person to life as you learn how to draw cartoon skateboarding. In just five steps, we show you how to draw the top cartoon skateboard. You can draw this freehand skateboard cartoon while looking at your computer monitor or printing off the page to get a closer look at each stage. On each page, we'll show you illustrations from each step, and then we'll give you a description of how to draw it. Follow the red lines in each illustration to learn exactly what to draw at that stage. The drawn lines are shown gray in the previous steps. The contents of the oval head design are long and thin. Draw a bigger ellipse on your side for the body. Add two short curved lines for the neck. The advertisement extends an arm in front of the body using an ellipse for hands and elbows and curved lines for the rest of the arm. Use three ellipses and two straight lines for the arm and the other hand. Draw your legs with U-shaped shapes and eggs. It shows the legs as an ellipse and a round triangle. The ankles form with two short lines. Advertising draws hair with V shape and curves. Use the U-shaped ear. Forming a U-shaped forehead, nose, and lips. Add a line in your left elbow. Use curves, J shapes, and U-shaped for fingers. Re-blow the neck with curves and J shape. Use the rear, curved and Figure 7 shapes for the shirt. Define shorts with J shapes and curves. Use curves, J shapes, and U-shapes for feet. Question marks for the ankle. Advertising draw curves on hair, ears, and shirts. Use comma-shaped eyebrows and eyelids. Eye shape with ellipse and curve. Draw rectangular wristbands. For elbow and knee guards, use U- and V shapes, curves, and ellipses. Draw the belt with curves and a line. Connect J shapes for high skateboarding; Add a line next to. Inserts a line between the legs. Shows the wheels as circular and U-shaped. Crispras curves to show momentum. Advertising darkens eyebrows and iris. It also darkens inside the foot of the shorts. Shadow elbow guards, knee guards, and wheels with many short lines. Add some very short lines to the wristband so they look fuzzy. It seems your cartoon skateboard is all set up for her performances. Great job! Advertising while our next cartoon character probably won't wow you with any cool flip trick, he's great to cuddle on the side. Continue to the next article to learn how to draw filled milk. Add shirts and put on designs add your wallet and done!! Easter Bunny is a fun character for cartoons She is bright, happy and full of excitement and color. While he may look a little difficult to draw, this tutorial will guide you through every step of the way. The neat part about pulling a cartoon bunny is that her features are exaggerated and the lines are simple. He is much easier to draw than realistic rabbits and his bunny can bring in any color or features you want. You will also notice that our Easter bunny is incredibly beautiful. He follows the standard archetype of Cute Character, which is very popular in cartoon body styles. This means that once you learn how to draw this bunny, you can also draw any other cute cartoon characters you'd like with just a few corrections. Easter Bunny Cartoon Step 1 - Basic Shapes. Once you start this painting, be sure to leave a bit of room on your page for the Easter bunny ears and feet - and of course, that's interesting Easter eggs. Let's start with two simple shapes: drawing a round diamond for one end and a curvy triangle for the bunny's body. If you pay close attention, you can see that the left side of the triangle intersects with diamonds at its low point. This gives the bunny's neck a foundation and doesn't look like it's balancing on the tip of the body. Draw the ears and feet of Bonnie Easter. Give your bunny some big ears and legs. That's what makes him look like a rabbit, right? The ears are just long ellipses attached to the top of his head. The legs are triangles where the top corners are rounded smoothly. Add a fluffy tail to it. Bonnie Easter's tail should seem fluffy. Draw three curve lines by starting halfway to the right side of your body. His arms are not too long, but they are just curved lines. Make sure the back arm connects directly to the line of his body and his front arm is in front of the body line (you need to do some wipe here). Now, we have a square where your left hand will be and put a funny curve shape for your right hand. You'll see a little bit how this looks. Adding some details is important. It's time for some important details, all of which are simply curved lines. Draw a long line with two curves at the bottom in his ears. Her hair is made up of three very lean curves between the ears. A curved line in each leg will add some foot. A lightning strike on his chest gives him more fur in the square hand, use the ellipses to create your thumb and thumbs. It must seem like he's crying something. Give the bunny an Easter egg. Add other details - a little circle for your belly button. Next, add a large ellipse for your Easter eggs in your outstretched hand and give him his brush in the hands of the closest to you. Use the instructions to help draw Bonnie Easter's face. Now we're going to pull Bonnie Easter's face, notice the light instructions going through the center of your face. It helps put your facial features in the right places. Two pairs of ellipses make the eyes and the antics. Note that his right eye (in Our left sits on the intersection. Center instructions. His left eye (our right) rests on horizontal instructions. This helps your face appear three-dimensional. Add two slightly curved triangles to fix his eyebrows. Draw an Easter cartoon smiling bunny. On the left and right sides of his head, and two curves to give Visker to him. Next, draw an ellipse for his nose slightly to the left of the intersection of center lines. Squirrels plotting down to the right of the bunny allow you to clearly see the shape that your mouth and nose will become. It also makes up the top part of her smile. On the right, the line has two large curves. On the left, a curve. Curves cross the center line and this helps her smile to look happy. Complete Bonnie Easter's expression with a few more lines. The three curved lines fix the rest of his mouth. You can see details of this on the bunny's right. The first curve of his teeth is a long curve. Her mouth is another curve that connects her teeth to the top of her smile. The third curve is the lower lip that passes through the lower corner of his head. Draw another curve inside his mouth for the tongue. Check out Bonnie Easter's custom with the outline. The last step is to add a dark outline around outside our Easter bunny character to help him stand out better. Keep the details thin like the facial stated. Also, use thin lines to brush the color of some bristles and style your Easter eggs with whatever pattern you like (it's best to keep it simple). Add some color to your Easter bunny. Finally, your Easter bunny in color. You can choose any color you'd like because the Easter bunny can be blue, pink, purple, or whatever you imagine him to be. Play down this original color with a darker shade for her nose and inside her mouth. A magnetna is good for the language of this bunny and her bright blue eyes really stand out. Easter eggs and paint brush can also give any color you want them to. Be.
